

Tamper Tabs Blue

Effervescent Bluing Dye Tablets

Brim's Bluing Tablets are a convenient and effective tool used to prevent urine sample adulteration during drug testing collection. Perfect for mobile urine collection and drug testing services. Each tablet contains FD&C blue dye which dissolves quickly to color toilet water a deep rich blue preventing sample dilution.

Bluing agents are mandated by the federal government in the collection of urine samples for drug testing. The Department of Transportation's (DOT) rule, 49 CFR Part 40, describes required procedures for conducting workplace drug and alcohol testing for the Federally regulated transportation industry.

Use:

Simply drop 1 tablet into toilet tank, wait 1-2 minutes for tablet to dissolve, flush toilet. For tank-less toilets; flush toilet, drop 1 tablet into toilet just as toilet begins to re-fill. For multiple tests, repeat procedure above.

Features and Benefits:

- Fast and accurate Bluing
- Great alternative to sloppy liquid dyes
- Non Corrosive, Non-staining—will not stain toilet, clothing or hands
- Convenient

Packaging:

Brim's Bluing Tablets are available in bottles of 100 counts.
